🧩 What I did today:

Today I installed a C compiler and learned how to create and run my first C program.
I created a simple “Hello World” program using C language.

⚙️ Tools used:

- Visual Studio / VS Code
- GitHub
- C Compiler (MinGW or Visual Studio compiler)

💻 Code created:

Hello World program in C and student profile program.

🔗 GitHub workflow:

I created a branch with my name and pushed all files only to my personal branch, not to main.
